CURRENT POSITION

Director (W3), Institute of Cardiovascular Immunology

RESEARCH EXPERTISE (SUMMARY)

My research focuses on the mechanisms by which cytoplasmic RNA sensors RIG-I like receptors (RLRs), RIG-I, MDA5 and LGP2, distinguish between viral RNAs and self-RNAs and trigger type I IFNs. Current work examines spontaneous autoimmune symptoms in RLR mutant mice derived via mutagenesis and how RLR-dysregulation causes autoimmune disease including monogenic lupus. I am also particularly interested in the analysis of immune responses and pathogenesis in virus infection in vivo and autoimmune diseases using mouse models.

ACADEMIC QUALIFICATIONS

- 2005 - 2008 Doctorate, PhD, Department of Host Defense, Institute for Microbial Diseases,
BIKEN, Osaka University, Japan
- 2003 - 2005 Master of Science, Department of Host Defense, Institute for Microbial Diseases,
BIKEN, Osaka University, Japan
- 2003 Bachelor of Science, Agricultural and Life Science,
The University of Tokyo, Japan

POSTGRADUATE PROFESSIONAL CAREER

- 2018 - pres. Director (W3), Institute of Cardiovascular Immunology,
University Hospital Bonn, Germany
- 2010 – 2017 Associate Professor in Prof. Takashi Fujita's lab, Institute for Virus Research,
Kyoto University, Japan
- 2008 – 2010 Postdoctoral fellow under Prof. Craig Mello,
University of Massachusetts Medical School, USA

HONORS AND AWARDS

- 2015 - 2017 Highly cited researcher (Clarivate Analytics / Thomson Reuter)
- 2008 – 2010 Postdoctoral Fellowship for Research Abroad from Japan Society for the Promotion of
Science (JSPS)
- 2008 Yamamura Award, Graduate School of Medicine, Osaka University
- 2005 – 2008 Research Fellowship for Young Scientists from Japan Society for the Promotion of Science
(JSPS)

PRINCIPAL FUNDING

2023 – 2026	DFG - Deutsche Forschungsgemeinschaft (TRR 237/1, Teilprojekt B22)
2019 – 2025	DFG - Deutsche Forschungsgemeinschaft (EXC 2151)
2018 – 2022	DFG - Deutsche Forschungsgemeinschaft (TRR 237/1, Teilprojekt B22)
2018 – 2021	AMED (AGS model)
2017 – 2018	The Kyoto University Foundation
2017 – 2018	Kato Memorial Bioscience Foundation (AGS and RLR)
2017 – 2022	AMED (HBV project)
2015 – 2018	AMED (rare autoimmune disease project)
2012 – 2017	AMED (HBV project)
2013 – 2016	Japan Science and Technology Agency (PRESTO)
2013 – 2014	Daiichi Sankyo Foundation of Life Science
