The goals of the Winter School „Immunology meets Genomics and Bioinformatics“ are:

- Stimulate curiosity and inspiration for the kissing points of immunology, genomics and bioinformatics
- Equip graduate students and young postdocs with advanced knowledge required to conduct research in these fields
- Provide an outstanding opportunity to establish scientific networks

Graduate students and young postdocs with background in natural sciences and medicine who are members of the International Immunology Training Program Bonn (IITB), the graduate program of the Bonn Cluster of Excellence ImmunoSensation. A limited number of places for external participants is available. Participation fee will be 850€ and covers accommodation and meals.

To register please send a letter of motivation, your CV and an abstract to c.drescher@uni-bonn.de.

Winter School

Immunology meets Genomics and Bioinformatics

3. - 7. January 2017

Obergurgl, Austria

limited to 30 students

Keynote Speakers:
Florent Ginhoux, Singapur
Andreas Keller, Saarbrücken
Oliver Kohlbacher, Tübingen

Faculty:
Regina Betz, Bonn
